

# Carp Garden

**'Carp Garden' by Studio Sur La Lune, available now on the Apple App Store.**

An app about collecting cute Koi fishes in a Japanese Zen Garden.

CARP GARDEN - April 22<sup>nd</sup> 2016 - Help Emi, the young care-taker of a Japanese Zen garden, collect the carps that live inside a pond! Carps come in several varieties and are attracted by unique toys that the player drops into the Zen garden. The pond is minutely reproduced in 3D and features intricate water physics simulation. The carps are also lovely modelled and are a delight to watch swimming around. Carps will also react to the player finger touch and drop coins into the pond. The coins can then be used to embellish the water garden and attract new varieties of carps.

## Key Features:

- Collect cute carps and watch them swim in the pond at your leisure.
- Interact with the carps by touching them.
- Beautiful water simulation. Use your finger to create ripple on the water and interact with the carps.
- Full 3D rendering of the pond and the carps, in 1080p at 60fps (iPhone 6).

## Pricing and availability:

*Carp garden* is now available from the Apple App Store for free (with in-app-purchases)!

Localized versions are available in English, Japanese, Chinese and French.

Requires iOS 7.0 or later. Optimized for iPhone, iPad or iPod Touch (minimum requirement iPhone 4S).
